Multi-access

Connects your employees or franchisees to BrandWizard with the ability to distribute access rights

Store Locator

Provides always up-to-date information about your locations on your website and in the app

The BrandWizard key features

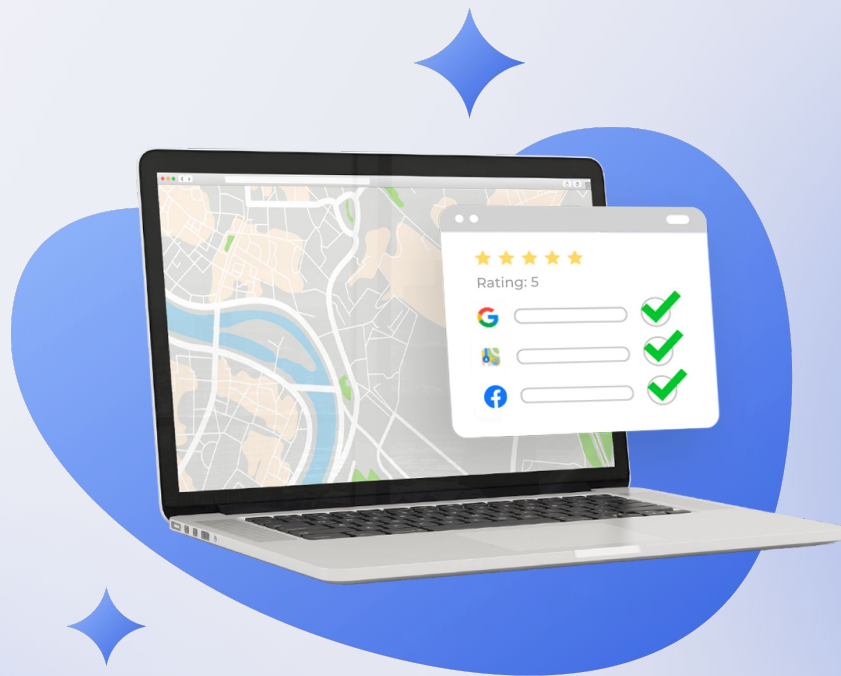

Adding locations and data actualization

What BrandWizard does

- Automates the process of submitting your company's data to 20+ popular digital platforms
- Quickly and efficiently verifies locations
- Ensures the accuracy and completeness of your information for each location

The result

- You locations are on all popular digital platforms with complete and relevant information
- A single dashboard for easy data management
- Increase of listing visibility in location-based services due to smart data optimization
- Daily support for data relevance and protection from third-party changes

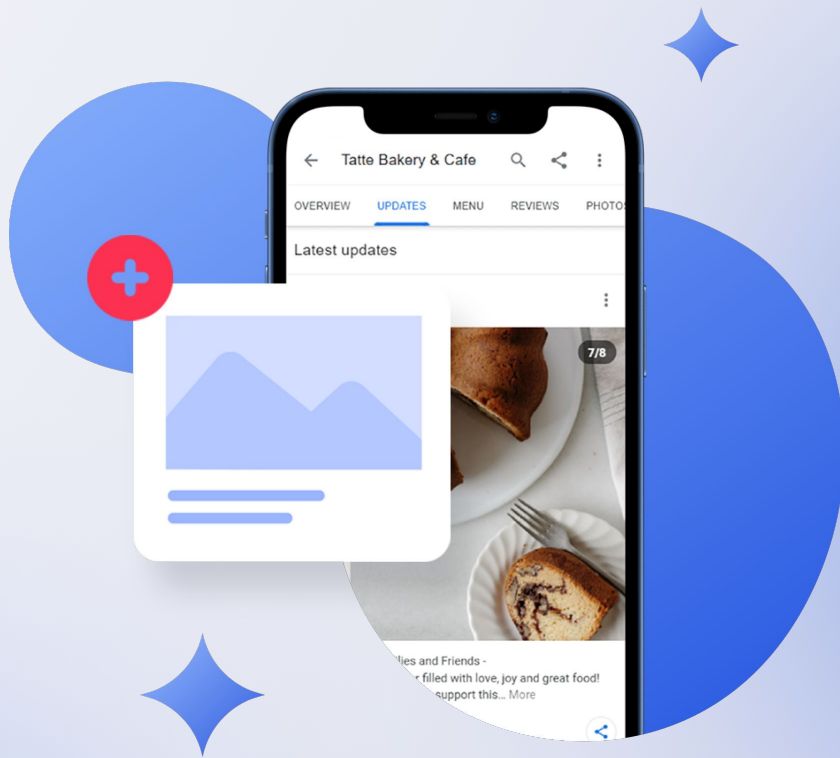

Post creation service

What BrandWizard does

- Allows you to manage publications from a single account, place them in available digital services and plan posting dates
- Generates post texts using the Chat GPT neural network

The result

- Increased company visibility in search: systematic work with posts and keywords in them helps listings be better indexed in search engines
- Increase in targeted actions: thanks to posts, you increase user engagement and motivate them to take targeted actions (calling, going to a website, building a route)
- Saving time on creating posts: create posts for different sites from a single BrandWizard account, without wasting time on the same actions in the interface of each site

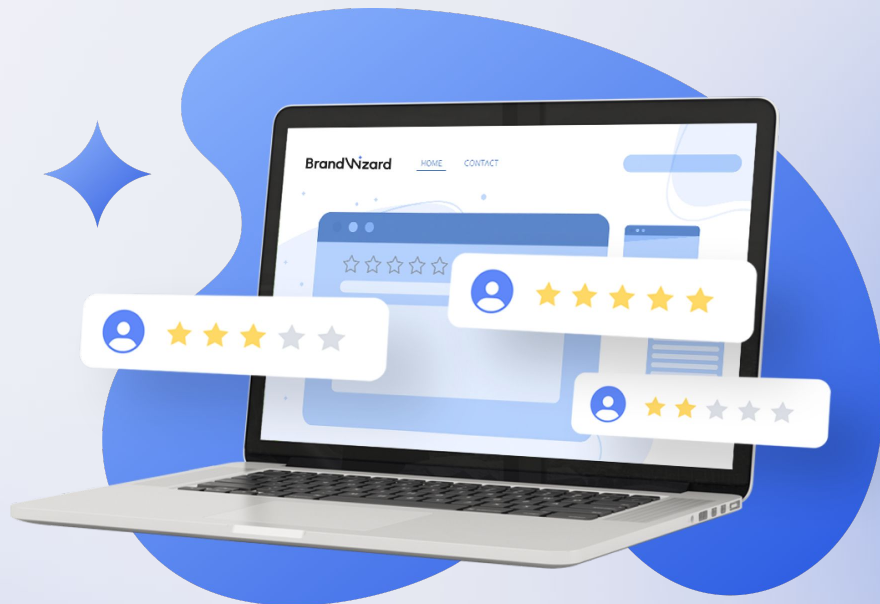

Review center

What BrandWizard does

- Monitors reviews about your company on popular platforms and 6+ review sites) and provides a unified interface for convenient work with them
- Automatically collects all reviews and gives the ability to respond to them from a single account
- Sends quick notifications about new reviews
- Provides templates for responding to reviews

The result

- Improved customer loyalty, increased rating/position in local search results and, as a result, conversion growth
- Quick response to reviews thanks to notifications via email or browser
- Saving employees' time by creating templates for review responses

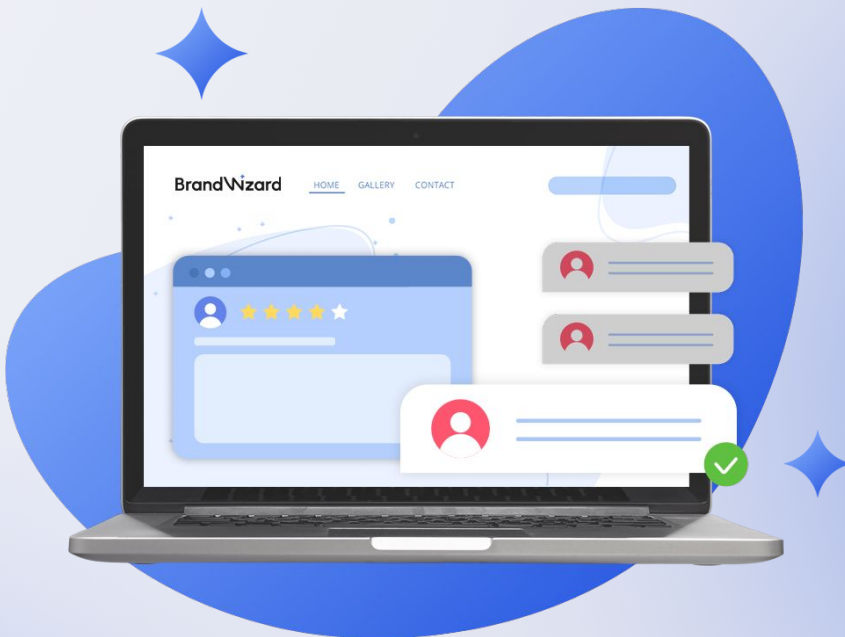

Autoreponder service

What BrandWizard does

- Enables customization and automatic sending of responses to reviews on any platform based on selected scenarios such as rating, timing of receiving the review, and review content

The result

- **Cost savings and process optimization:** automating the handling of reviews streamlines employee time
- **Improved search ranking:** consistently managing reviews has an impact on the company's rating, increasing the likelihood of appearing in the top of local search results
- **Increased customer loyalty:** review responses in company's listings build trust and motivate users to take specific actions that drives conversions

Review generation with QR code or links

What BrandWizard does

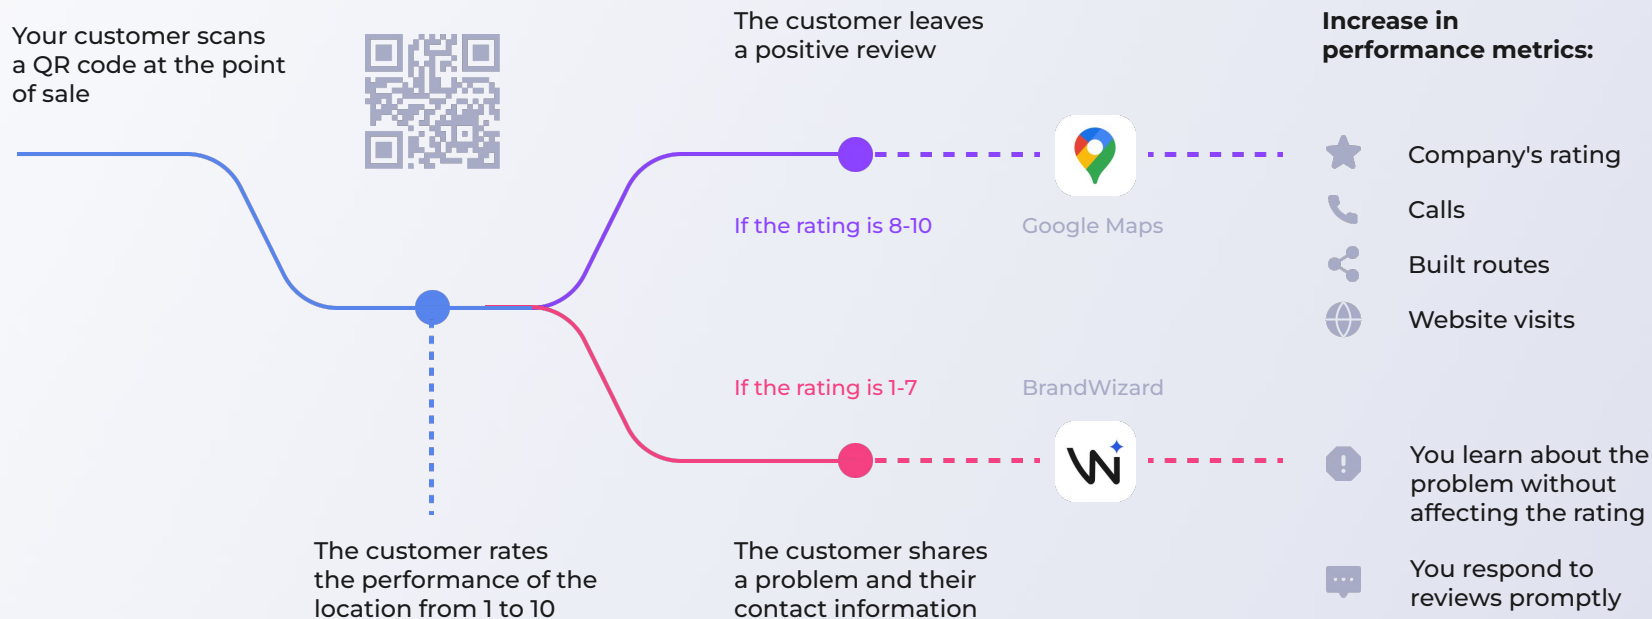

- Helps to generate reviews using a QR code with a request to leave feedback about products and services at a specific location
- Provides you with the intelligent algorithm for distinguishing between positive and negative feedback. Positive reviews are posted on location-based services, while negative ones go to a personal account without publication on maps that gives you a chance to process them properly

The result

- **Growth of company's rating:** processing negative reviews and increasing the number of positive ones forms a high rating, making your company stand out from the competition
- **Increase in audience reach:** the higher the rating of the listing, the more often the search engine shows them to users in the search results, increasing your chances of attracting new customers
- **Conversion increase:** listings with a high rating increase the likelihood of targeted actions by the client (calls, clicks to the site, built routes)

Improving rating on maps with QR codes

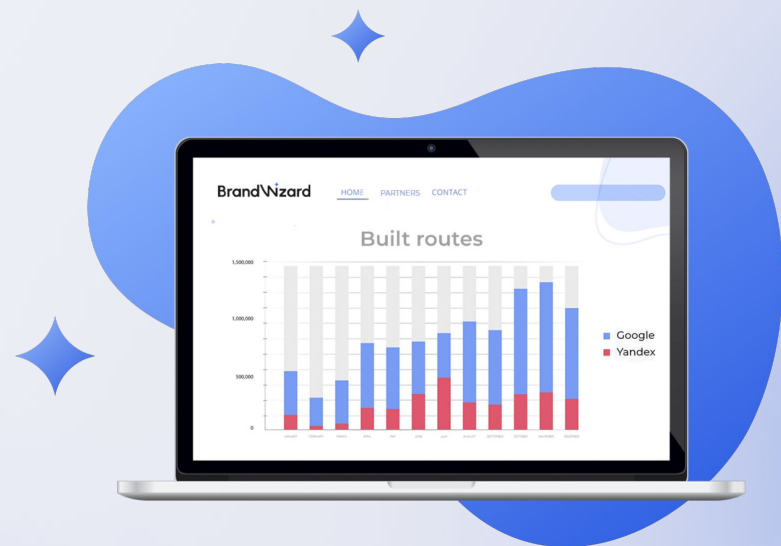

Online presence advanced analytics

What BrandWizard does

- Controls data status (synchronization and completeness of data in listings)
- Displays target actions in listings (calls, built routes, website visits)
- Shows distribution of listings by rating on platforms
- Provides summary data on reviews in report form

The result

- You monitor the status of information on each platform and at each point of sale
- You analyze the visibility of your listings and the number of target actions over a period of time and in dynamics to evaluate the effectiveness of local optimization
- You receive a ready-made report on the local promotion of your company or create it yourself in your personal account*

***There are 2 formats of reports:** monthly report with recommendations for improving metrics; in a personal account for viewing data at any convenient time

Online reputation analysis

What BrandWizard does

- Analyzes all reviews and ratings in one place
- Monitors the mood of customers: determines the sentiment of reviews (positive, neutral, negative)
- Finds popular words in your reviews using a system of tags, phrases, themes, and professional concordance analysis
- Monitors employee performance (response time, handling of negative feedback, number of processed reviews) and allows for setting KPIs
- Enables detailed competitive analysis based on reviews and ratings. Analyzes the reputation management of your partners (franchisees, dealers)

The result

- You are always aware of the sentiment and topics being discussed by your customers and competitors, and can develop a sound strategy for managing reviews and building reputation

Local rank tracker

What BrandWizard does

- Gives a complete picture of local search results for keywords and a given radius
- Calculates the average listing's position and tracks its dynamics
- Analyzes listings' positions on different sites and tracks progress

The result

- Monitoring the status of information on each site and at each point of sale
- Efficiency of local optimization by evaluating the visibility of your listings and the number of target actions over a period and in dynamics
- Defining the growth points for your company to increase audience reach and attract leads with the help of local promotion

Customer service

Customer service support

We study clients' business tasks and goals, give recommendations on your digital performance as well as share useful knowledge and insights to optimize your listings in the best possible way. With BrandWizard you get:

- 2 dedicated managers who will guide you through the process and answer all your questions
- Training for the client's team
- Help with uploading data to the platform and synchronizing with digital sources
- Support and management of the location verification process for the client
- Monitoring and facilitating the process of adding and updating data in location-based services (including communication with platforms' support)
- Assistance with template and auto-reply setup
- Assistance with removing inappropriate reviews
- Quarterly reports with detailed information on online presence and identified growth points
